#### **DETAILED ACTION**

##### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8, 14 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hahn 3,665,618.

As to claims 1-3, Hahn shows a game board 10, with a means for covering and uncovering 20, calling cards 36 and game card 24.

##### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7, 13, 15 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hahn in view of Shaw.

As to claim 4, placing indicia on two sides of game cards is old and well known in games like that of Hahn so that both sides of the card can be utilized. As to claims 5 and 6, supporting game displays at an incline on a support surfaces using folding legs that store in a nested position when not in use is old and well known. See Shaw. To have provided supports such as 30 shown by Shaw would have been obvious in order to more comfortably dispose the display before a player during use. Claim 7 is considered an obvious matter of design choice. Applicant has not shown where such a design has solved any particular problem or produced any unexpected results. While the prior art has not shown such a design in the art of a bingo display, the problem facing the inventor at the time the invention was made was resting a display at an angle on a flat surface using foldable legs which can be found in many endeavors. The back of a computer keyboard for example uses such retractable legs to support it at an angle on a flat surface. As to claim 13, the use of color to differentiate elements and claims 15 and 20 the use of clues and points in question and answer type games is old and well known.

***Conclusion***

Claims 9-11 and 16-18 call for the internal structure of the claimed invention which is not shown by Hahn. Nor does the cards show notches as called for by claim 12.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Beardsley, Kellen, Lynd, Hanson, Richter, Walker and Kalivas show games.
